

ACCELERATING ELECTRIFICATION OF HIGH MILEAGE VEHICLES

The City of Phoenix, in collaboration with C40 Cities and WSP, has undertaken the development of an Action Plan aimed at advancing the electrification of high-mileage vehicle (HMV) fleets, including ride-hailing services and taxis. Building on the city's stated goals, this initiative aligns with available funding and market capacity to assist communities in lowering emissions and enhancing overall quality of life.

While recommendations will be tailored to Phoenix's unique operational needs, the findings of this project will serve as a roadmap for cities and transport aggregators worldwide as they expand their EV fleets.

Throughout the project, the team intends to actively engage members of the community. To stay informed or get involved, please scan the QR code to visit the project webpage!

If you have any questions or need additional information, contact Karen Apple, Electric Vehicle Program Manager (karen.apple@phoenix.gov).
